### **20a. How does the Committee accomplish its purpose?**

The Provincial Advisory Committee was formed to advise seven federal agencies concerning implementation decisions and details pertaining to the Northwest Forest Plan (applicable to federal forests in Western Washington, Oregon and Northern California). The PACs identify concerns, which in turn are used to recommend budgeting priorities for available federal funds on key elements of the plan such as watershed restoration, watershed analysis, and subsequent project planning efforts. Advice is tailored to site specific areas in the plan area. Intergovernmental and public relationships improve significantly as a result of these advisory committee meetings.

### **20b. How does the Committee balance its membership?**

On September 30, 1994, USDA published the NOI in the Federal Register announcing the Pacific Northwest Forest Plan. The Federal agencies affected by the plan formed 12 groups called the Provincial Interagency Executive Committees or PIECs for each of the 12 provinces identified in the plan. The charter lists interests that need to be represented on each of the 12 provincial advisory committees as follows: 1 rep. from the Environment Protection Agency; 1 rep. from the USDA Forest Service; 1 rep. from the Bureau of Land Management; 1 rep. from the National Park Service; 1 rep. from the Bureau of Indian Affairs; 1 rep. from State government; 1 rep. from each county where province is located (maximum of 3); up to 3 reps. from Tribal government; 2 reps. from environmental interests; 2 reps. from the forest products industry; reps. from the recreation and tourism industry; 3 to 5 reps from fish, wildlife, or forestry conservation organization such as the

Bureau of Reclamation, National Biological Survey, Forest Service Research, U.S. Army Corps of Engineers, U.S. Geological Survey, Bonneville Power Administration, Department of Defense, and the Natural Resources Conservation Service.

#### **20c. How frequent and relevant are the Committee Meetings?**

Initial meetings focused on building understanding of the Northwest Forest Plan and effective working relationships among the seven agencies identified in the charter. Meetings now also focus on implementation matters such as advising agencies concerning priorities for allocation of limited federal funds toward watershed restoration and watershed analysis needs as required by the plan. During the summer field trips give members an opportunity to see and discuss the forest situation first hand. Members are using their increased knowledge of the Northwest Forest Plan and their working relationships with other members to provide ongoing advice about making the Northwest Forest Plan work on the ground in real time. Members have also provided a valuable platform for collaborating on elements of the Forest Plan Revision project. The PAC meets 1-5 times annually or as needed to perform its duties. The PAC met twice in 2017, in January and in April.

#### **20d. Why can't the advice or information this committee provides be obtained elsewhere?**

Close cooperation among the many agencies having a management responsibility in the area and a forum where the public's views may be heard are key components of the PAC. The PAC provides an opportunity for Federal managers and the public to discuss the issues they identify and to offer advice and recommendations to decision makers on how to address those issues. Common effort and working together through the committee structure give rise to combined efforts that brings better management of the provinces set up in the plan.

#### **20e. Why is it necessary to close and/or partially closed committee meetings?**

All meetings are open to the public.

#### **21. Remarks**

There were two Eastern Washington Cascades PAC meetings in 2017, one in January and another in April. The Charter for the PAC expired in May 2017, no meetings have occurred since that time. All costs reported for FY2017 are for outreach efforts and general administrative costs for managing the PAC.

#### **Designated Federal Officer**

Mike Williams Forest Supervisor

### **Narrative Description**

The Provincial Advisory Committee was formed to advise seven federal agencies concerning implementation decisions and details pertaining to the Northwest Forest Plan

(applicable to federal forests in Western Washington, Oregon and Northern California). The PACs identify concerns, which in turn are used to recommend budgeting priorities for available federal funds on key elements of the plan such as watershed restoration, watershed analysis, and subsequent project planning efforts. Advice is tailored to site specific areas in the plan area. Intergovernmental and public relationships improve significantly as a result of these advisory committee meetings. Since 1994, the Provincial Advisory Committees and Provincial Interagency Executive Committees have met for the purpose of facilitating the successful implementation of the Northwest Forest Plan. There were 12 Provincial Advisory Committees in Oregon, Washington, and Northern California. However, only two have been re-established in 2015. 1) Eastern Washington Cascades PAC; and 2) Deschutes PAC

**Outcome Comments**

The Eastern Washington Cascades Provincial Advisory Committee has provided an excellent forum for discussion of forest plan revision issues and collaborative input to plan elements, and also provided input on the Motorized Travel Management Plan.

**What are the cost savings associated with this committee?**

Checked if Applies

- |                            |                                     |

### **Cost Savings Comments**

Not applicable.

**What is the approximate Number of recommendations produced by this committee for the life of the committee?**

5

### **Number of Recommendations Comments**

The committee: 1. accepted the forest plan monitoring recommendation proposed by the forest 2. advised against including over the snow transportation as part of the Motorized Travel Management Plan 3. proposed building in a process for discussion about forest plan revision monitoring 4. recommended that a chipper be available for fuel reduction 5. asked that a district ranger be in attendance at all future meetings

**What is the approximate Percentage of these recommendations that have been or will be Fully implemented by the agency?**

0%

### **% of Recommendations Fully Implemented Comments**

Many of the projects discussed at Provincial Advisory Committee meetings vary from monitoring to full implementation. Because many of these projects are on-going and vary from forest to forest, state to state, determination for full implementation of some projects may be unpredictable.

**What is the approximate Percentage of these recommendations that have been or will be Partially implemented by the agency?**

0%

### **% of Recommendations Partially Implemented Comments**

Since 1994, many projects have not been fully implemented due to budget constraints and declines in the workforce of the Forest Service, Bureau of Land Management and other regulatory and participating agencies that are mentioned in the Record of Decision. However, Provincial Advisory Committees remain steadfast in their commitment to deliver recommendations to implement the Northwest Forest Plan, as intended in the ROD of 1994.

**Does the agency provide the committee with feedback regarding actions taken to**

**implement recommendations or advice offered?**

Yes ☐ No ☐ Not Applicable ☒

**Agency Feedback Comments**

Not applicable.

**What other actions has the agency taken as a result of the committee's advice or recommendation?**

**Access Comments**

Each of the Provincial Advisory Committees (PAC) have networked the accomplishments of their PAC via website, newspaper, radio, community review boards, and by simply sharing with other agencies and community groups during public established meetings.

Some PACs have subcommittees that accompany the great work the PACs have accomplished. Furthermore, each of the PACs outreach to underserved groups to serve on the committee in order to better reflect the communities in which they serve.
